Work Experience

Full Stack Developer

Florida Blue   *May 2021 – Current*

- Contributed to the development of a web application for creating insurance plans, working with technologies such as React, Spring boot, and Material-UI.
- Collaborated on an internal chatbot application, participating in writing business logic in Python RASA and developing the frontend in React.
- Assisted in configuring RedHat OpenShift/Kubernetes/Docker for deployment, working with Gradle to ensure efficient build processes.
- Utilized GitLab for version control requirements and Rally for work item management.

Education

University of North Florida (GPA 4.0)   *August 2018 – May 2022*
Bachelor's Degree in Computer Science

Personal Projects

- Spring Boot Rest API: Designed GET and POST APIs, implemented TDD, and managed Apache SQL server connectivity.
- Tab Bucket (Firefox Extension): Developed an extension to save browser tabs. Available [here](https://addons.mozilla.org/en-US/firefox/addon/tabbucket).
- Multithreaded Socket Server (Java): Implemented a server handling multiple client requests concurrently.
